I'm a collaborative Software Developer experienced in building clean, responsive, performant web applications. Comfortable in an agile environment, working closely with Product Managers/Owners, Designers, Developers/Engineers, and QA to design and develop impactful solutions, as well as translate user and business needs into clean, efficient, reusable code. I'm most passionate about learning, problem-solving, clean design, and I love to take ownership of the entire development process from start to finish to deliver my best work.
